Creating a spacious, contemporary, high end look in this 1960s ranch was accomplished by removing a few existing walls and taking the ceilings to new heights. The new top-of-the line kitchen takes center stage with its sleek and dramatic lines. The open space now wraps around the fireplace, embracing the contemporary feel and visually blending the custom maple cabinetry, huge curving island, and adjoining spaces to make it feel like one big welcoming space. Stop by and see the lower level recreational/home theater room.
